EVC Series
Video Conferencing

Your Best Collaborative Communication Solution

Why AVer Video Conferencing?

The incredible price-to-performance, trouble-free installation and straightforward operation of our EVC Series translates into a distinctly appealing full HD 1080p video conferencing solution. The range of models in the EVC Series are all H.323 and SIP compatible, including the point-to-point EVC130, EVC130P, EVC150, the 4-point EVC300, EVC350 as well as the 10-point EVC950, meaning users are guaranteed to find a video conferencing system that is just right for them. AVer's industry first, one-touch recording allows users to record everything on the screen directly to any flash drive and our EZMeetup software ensures that participants can be reached on their mobile devices when out of the office. AVer's EZDraw collaborative software for video conferencing is available for Android tablets or iPads. It makes collaborative communication during video conferencing extremely fast and easy. The interoperability and simplicity of the EVC Series, coupled with the system's high quality video and audio performance, make it an equally attractive endpoint solution for system integrators, video conferencing as a service (VCaaS) providers, Internet telephony service provider (ITSP), telecoms and more.

AVer Video Conferencing Features
